

In the Claims:

Please cancel claims 2-7, 11, and 13-14, replace claims 1, 8-10, 12, and 15-17, and add new claims 18-21, all as shown below.

1. (Currently Amended): A system for ~~providing extensible~~ extending online help, comprising:
~~providing~~ a help system ~~adapted to that~~ processes documentation content upon import of an integrated development environment extension, wherein the help system includes context-sensitive help topics; and

~~providing~~ a help display ~~adapted to provide display operations for the help system, wherein~~ search capabilities and table of contents are automatically updated after the integrated development environment extension is imported.

2 – 7. (Cancelled)

8. (Currently Amended): The system ~~computer program product~~ of claim 1 wherein the help system ~~may~~ includes a control and a control property.

9. (Currently Amended): The system ~~computer program product~~ of claim 1 ~~7~~ wherein the help system ~~can be~~ is integrated with an extension installation mechanism.

10. (Currently Amended): The system ~~computer program product~~ of claim 1 ~~7~~ wherein the help display is configured to display content in a web browser.

11. (Cancelled)

12. (Currently Amended): The system ~~computer program product~~ of claim 1 7 wherein the help display is externally controllable.

13 - 14. (Cancelled)

15. (Currently Amended): The system ~~computer program product~~ of claim 1 14 wherein the context-sensitive help topics are organized by a context ID.

16. (Currently Amended): The system ~~computer program product~~ of claim 15 wherein the context ID is a fully qualified Java class.

17. (Currently Amended): The system ~~computer program product~~ of claim 15 wherein the context ID is a fully qualified name from a non-Java resource.

18. (New): The system of claim 1, wherein the documentation content is in HTML or XML format.

19. (New): The system of claim 1, wherein the documentation content can support delivery of help for a particular component in a single archive file.

20. (New): The system of claim 19, wherein the archive file is a JAR file.

21. (New): The system of claim 1, wherein integrated development environment widgets, controls, and control properties are associated with documentation topics that can be automatically displayed in the help system when requested by a user performing a context-sensitive help gesture.
